

Application

HEPA Filters are used in situations requiring high or very high levels air purity. Typical applications can be found in hospitals, microelectronics, medicine, chemistry, pharmacy, microbiology, laboratories and food industry.

Advantages

- For laminar flows
- Large filter surface
- Low pressure drop, reduced energy consumption
- Optimised velocity distribution
- Guaranteed leak-free
- Mechanically stable
- Minimum risk of damage
- One piece, no leak gasket

HEPA FILTERS Hepafil 69

Properties

FILTER CLASS (EN1822)	H11	H13	H14	U15
Global Efficiency % for MPPS	≥ 95 %	≥ 99,95 %	≥ 99,995 %	≥ 99,9995%
Local Efficiency % for MPPS	-	99.75%	99.975%	99.9975%
Recommended Final Pressure Drop	600 Pa	600 Pa	600 Pa	600 Pa
Max. Final Pressure Drop	1000 Pa	1000 Pa	1000 Pa	1000 Pa
Continuous Temperature Resistance	80°C	80°C	80°C	80°C
Max. Relative Humidity Resistance	100%	100%	100%	100%
Frame	Aluminium and MDF			
Face Guard	Epoxy painted expanded aluminium grids on both sides			
Gasket	One piece foamed polyurethane			
Fire Resistance Class	K1 / F1 according to DIN 53438			
Filter Stage	III			
TESTING	Each filter individually tested according to EN 1822			

For MDF Frame filter one and two side with protective grids optional
